About Me

Dynamic Solution Architect with over ~20 years of expertise in Cloud Engineering, Linux - Middleware Administration and DevOps. Proven track record in designing and implementing scalable, secure infrastructure solutions that drive digital transformation and optimize performance. Skilled in leading cloud migrations and automation projects, enhancing operational efficiency while ensuring compliance and high availability. A collaborative leader recognized for delivering innovative strategies that reduce costs and foster business growth through technology-driven solutions.

Education

BE (Electronics)

KaviKulguru Institute of Tech and Science
Nov 2000 - Nov 2004

FPGDST (Software Technology)

Centre for Development of Advanced Computing
May 2005 - Jun 2006

MBA (Executive)

Symbiosis Institute of Business Management
May 2011 - Nov 2012

Achievements

- UAE (ADIB Bank): Customer Recognition for DevOps Implementation - HCL Technologies
- Australia: (Virgin Australia) Client Appreciation received for successful Application Transitioning - NIIT Technologies
- Thailand (Toyota): Recognition Received for infra implementation and client engagement - NIIT Technologies
- United Kingdom: (Vodafone) Production support -

Work Experience

Site Reliability Engineer

Oct 2024 - Present

HCL Tech Ltd • Noida

- Reduced Mean Time to Resolution (MTTR) by 45% through automated incident response workflows, root cause analysis frameworks, and operational runbook standardization.
- Reduced critical production incidents by 40% through implementation of observability solutions, capacity planning, and predictive monitoring strategies.
- Implemented Infrastructure as Code and automated provisioning processes, reducing environment setup time from days to under 1 hour.
- Increased deployment frequency by 60% and reduced release failures by 35% by implementing CI/CD automation and streamlined deployment pipelines.
- Improved application response time by 30–40% through performance tuning, infrastructure optimization, and bottleneck analysis.

Middleware and DevOps Architect

Jun 2022 - Sep 2024

HCL Tech Ltd • Noida

- Optimized JVM performance parameters resulting in 25% better throughput for high-traffic applications.
- Designed and implemented Infrastructure as Code (IaC) frameworks using Terraform and Ansible, reducing environment provisioning time from 3–5 days to less than 1 hour and improving deployment consistency.
- Architected and implemented a GitOps-driven deployment platform on Google Kubernetes Engine using Argo CD and Helm, reducing deployment effort by 70%
- Architected and deployed URL-based traffic redirection mechanisms at web server and load balancer layers supporting large-scale domain migration initiatives, achieving 100% seamless user redirection with no business downtime or service impact

Cloud Migration Lead

Jan 2019 - May 2022

HCL Tech Ltd • Noida

- Led end-to-end migration of 200+ enterprise applications from on-premises environments to cloud platforms while designing high-availability and Disaster Recovery architectures, achieving 99.99% application availability and reducing infrastructure costs by 30%
- Architected multi-region and Disaster Recovery solutions with automated failover capabilities, reducing Recovery Time Objective (RTO) by 60% and improving Recovery Point Objective (RPO) compliance by 50%.
- Designed multi-cloud infrastructure spanning GCP, AWS, and Azure with 99.95% availability using Infrastructure as Code, reducing provisioning time by 90%
- Developed cloud landing zone architecture including networking, IAM, security controls, and governance frameworks, reducing environment setup time by 70% and improving compliance adherence.

Cloud Operations Lead

Mar 2016 - Dec 2018

HCL Tech Ltd • Noida

- Led cloud infrastructure monitoring and incident management initiatives, reducing Mean Time to Resolution (MTTR) by 45% through proactive alerting and automated remediation processes.

Amdocs (Quarterly Performance Award received)

Expertise

Cloud: AWS, Azure, GCP
Containers: Docker, Kubernetes, Helm, OpenShift
IaC: Terraform, CloudFormation, Ansible
CI/CD: Jenkins, Azure DevOps, GitHub Actions, ArgoCD
Monitoring: Dynatrace, Splunk, Prometheus, Grafana, ELK, Datadog
Languages: Python, Shell, PowerShell, Java
Middleware: WebLogic, WebSphere, JBoss, Tomcat, MQ
OS: CentOS, RHEL, Ubuntu, Windows Server
DB: Oracle, MySQL, PostgreSQL, DynamoDB, AWS RDS / Aurora
Database ETL : Aws Glue, Databricks

Languages

English (Fluent), Hindi (Fluent), German (A2)

Soft Skills

Stakeholder & Executive Management
Cross-functional Team Leadership
Strategic Planning & Decision Making
Client Engagement & Relationship Management
Problem Solving & Root Cause Analysis
Mentoring & Team Development
Risk & Change Management
Communication & Presentation Skills

- Optimized cloud resource allocation through capacity planning, auto-scaling, and right-sizing strategies, achieving 20–30% infrastructure cost savings without affecting performance.
- Architected and deployed an event-driven GitHub–Jira integration using GitHub webhooks and Python Flask services, automating issue-to-ticket lifecycle management and reducing manual ticket creation effort by 70%, improving developer productivity and process consistency.
- Led cloud patching, upgrade, and maintenance activities for production environments, ensuring 100% compliance with security and operational standards.
- Automated backup and recovery processes for cloud workloads, improving recovery efficiency and reducing operational risk.

Systems Consultant

Nov 2012 - Mar 2016

NIIT Technologies Ltd • Greater Noida

- Implemented fully automated CI/CD pipelines with SVN, Nexus, and Jenkins for build and artifact management, improving build efficiency by 400%
- Led CentOS kernel upgrades and virtualization using Hyper-V, KVM, and VMware, reducing environment provisioning time by 80%.
- Built Python and WLST self-service automation for JMS provisioning, eliminating manual requests by 100%.
- Implemented predictive monitoring with automated remediation, delivering \$50 K annual savings through reduced outages and improved operational efficiency.

Associate

Dec 2011 - Nov 2012

JP Morgan Chase & Co • Mumbai

- Managed critical trading systems infrastructure with 99.99% uptime requirement
- Implemented ITIL v3 processes improving change success rate to 98%
- Designed and automated SQL-based management reports using complex query optimization and joins, improving reporting accuracy and accelerating decision-making.

Middleware Expert

Jul 2010 - Dec 2011

Hewlett Packard GDIC Ltd • Bangalore

- Implemented and supported PCI DSS infrastructure controls including system hardening, access management, and security monitoring, contributing to 100% audit compliance.
- Optimized Global Pay Plus platform handling \$1B+ daily transactions

Sr Subject Matter Expert Infra Integration

Jul 2006 - Jun 2010

Amdocs DVCI Pvt Ltd • Pune

- Developed ENVIMG automation tool reducing environment setup time by 95%
- Implemented comprehensive monitoring reducing system outages by 80%

Certifications

- Google Certified Associate Cloud Engineer (2025)
- **Certificate course in AI ML using Python IIT Madras (Nov 2025 - Mar 2026)**
- **Claude with Amazon Bedrock Anthropic (April 2026)**
- Splunk Administration Skillsoft (2025)
- ITIL v3 Foundation (AXELOS 2023)
- Professional Agile Leadership I(PAL I) Scrum.org (2025)
- Getting started with Apache Kafka (SkillSoft 2024)
- Establishing AI Guardrails and Governance(SkillSoft 2024)
